-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1, 3 and 5 are considered vague and indefinite because of the limitation that the trash receptacle is "improved". It is unclear how the receptacle is improved and over what type of container it is considered improved.

The dependent claims not specifically mentioned are rejected as being dependent upon a rejected base claim since they inherently contain the same deficiencies therein.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Freedland(U.S. 5,971,194). Freedland teaches a trash receptacle, shown in figure 1, having a trash receptacle body 3 defining a chamber and an opening 11, and a sheet holder 29. Regarding claim 5, the frame is considered to be element 13, and the disposable trash container is element 8.

Art Unit: 3727

5. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams (U.S. 6,378,721). Williams teaches a trash receptacle 10 having a receptacle body 14 and a disposable sheet holder comprised of elements 18 and 54. Elements 35 are the openings of the receptacle body.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams (U.S. 6,378,721) in view of Regis, Jr. (U.S. 3,405,836). Williams teaches a trash receptacle having a second hinge assembly 36, a second flange 18 and a first flange 54. Williams does not teach that the first flange is attached to the body by a first hinge assembly. Regis, Jr. teaches that it is known to provide a container with a first hinge assembly 48, a first flange 46, a second hinge assembly 40 and a second flange 38. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the trash receptacle of Williams with the first flange 54 being attached by a first hinge assembly, as taught by Regis, Jr., in order to prevent loss of the first flange.

Regarding claim 4, the attachment frame comprised elements 16 and the trash container is element 40.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the closure and/or flexible liner.

9. THIS ACTION IS NON-FINAL.
